Governance of Open Data Programme

NZ Government Open Access and Licensing framework (NZGOAL) 2010

Recommended guidance for agencies
to use when releasing copyright and
non-copyright material for re-use by
third parties

NZ Data and Information Management Principles (2011)

2012 INTERNATIONAL OPEN GOVERNMENT DATA CONFERENCE

Declaration on Open and Transparent Government

- Directed Public Service departments to actively release High Value Public Data for re-use (Wider government sector encouraged)
- In accordance with open data principles and NZGOAL
- Declaration passed August 2011
- First annual report back March 2012

Letter to Chief Executives (December 2011)

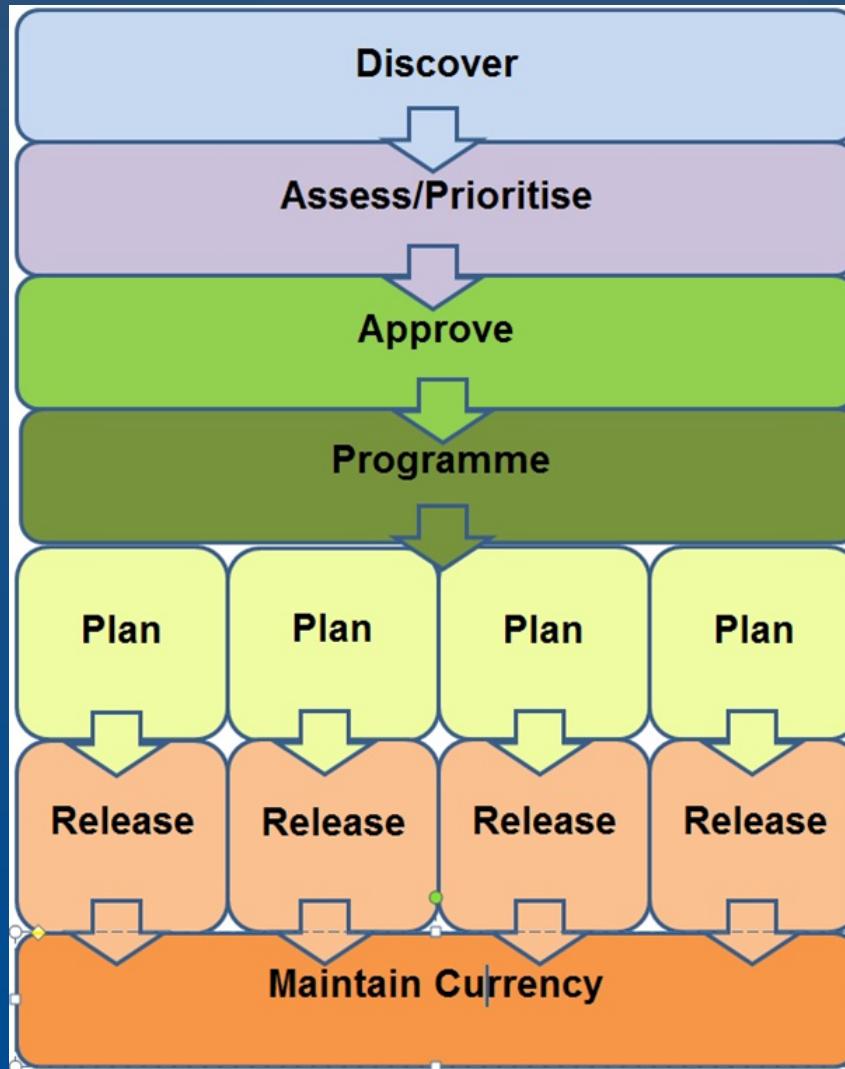

- Reminder to report back by March 2012
- Requested appointment of a Data Champion at senior management level

Guidance to Data Champions (January 2012)

- Explanation of role
- High level description of a process to release data
- Description of the Outcomes (that would be satisfied by the release of “high value public data”)
- Template of the Report-back questionnaire
- A case study to illustrate release and outcomes (Charities Commission)

High Level Release Process

High Value Public Data must have one of these outcomes...

Economic & social outcomes	Transparency & democratic outcomes	Efficiency outcomes
Business can use it to add value, innovate & create new products to spur economic growth	It reports on the performance of an agency or service	It supports cross-sector service delivery, e.g. other agencies & NGOs can use it to improve their services
Communities and people can use it to: <ul style="list-style-type: none">• develop useful applications/ new services• make informed decisions about the government services they use• make personal decisions that improve their quality of life	It provides details of government funding and/or expenditure	Releasing it for re-use could: <ul style="list-style-type: none">• make it easier for government agencies to work together• reduce the cost of providing an existing government service• reduce the cost of accessing and processing this information for existing users
It provides information about sustainability and risk.	It provides an evidence base informing & encouraging external participation in policy development	It helps align central & local government initiatives through a more coordinated national view of government data

Report-back to Ministers

- Inclusion in core business planning
- Current releases
- Future releases
- Use of data.govt.nz; NZGOAL; formats; and outcomes
- Brief case studies (paragraph or two)
- Describe insurmountable barriers
- Any other comments

Case Studies on Re-use of high value public data (across government)

Re-use of Open Government Data

Websites

The screenshot shows the homepage of the 'before u dig' website. At the top, there's a red banner with the 'before u dig' logo and a 'ROADWORKS' sign. Below the banner is a login form with fields for 'Username' and 'Password', and a checkbox for 'I agree to the Terms & Conditions'. There are also links for 'Forgot Password?' and 'New User? Register Now!'. To the right, there are two boxes: one for an 'ONLINE SYSTEM UPDATE COMING!' and another for 'NEW - CORRIDOR ACCESS SERVICE'.

The screenshot shows the homepage of the 'zoodle' website. The header features the 'zoodle' logo and a search bar. Below the header, there's a main heading 'Find out everything about New Zealand property' and a subtext 'Find out a home's value, local house prices, neighbourhood stats and much more!'. To the right, there's a list of features: 'Find information on over 1.5 million homes', 'Get up-to-date property valuations', 'Buy reports on local house sales', 'Research local property sales statistics', and 'Find information on schools, communities and more.'. At the bottom right is a button labeled 'Buy a Property Report'.
