Multi Tier Approach

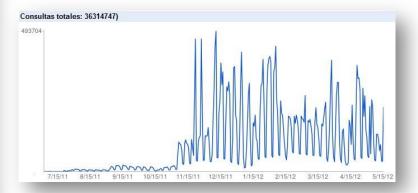

- 99% of information is unstructured.
- 0.9% is structured information.
- 0.1% is enhanced information.

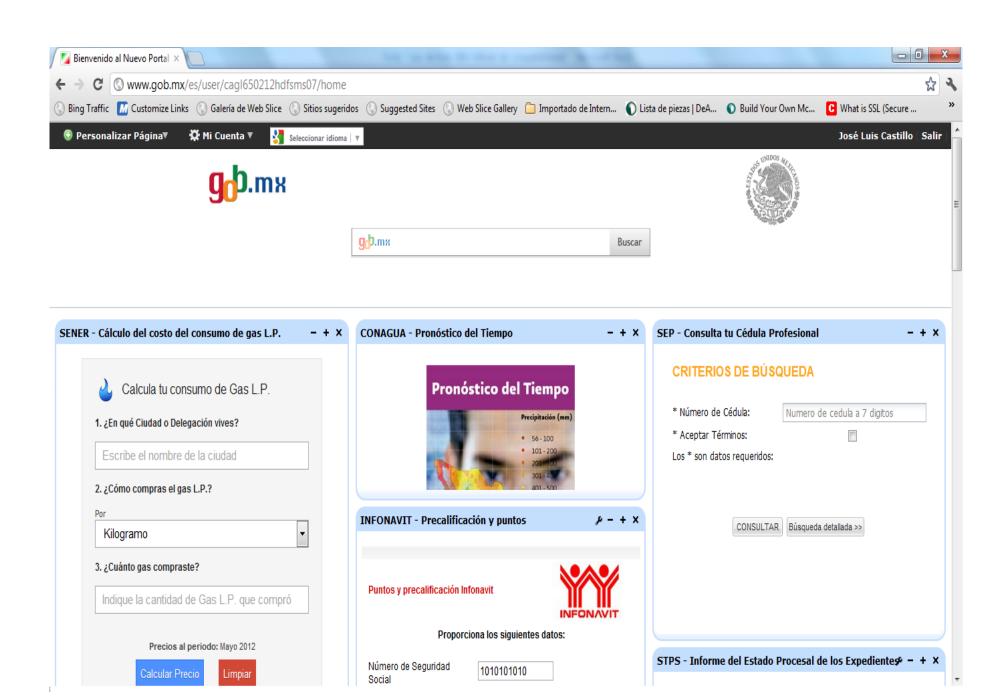

Citizen portal - gob.mx

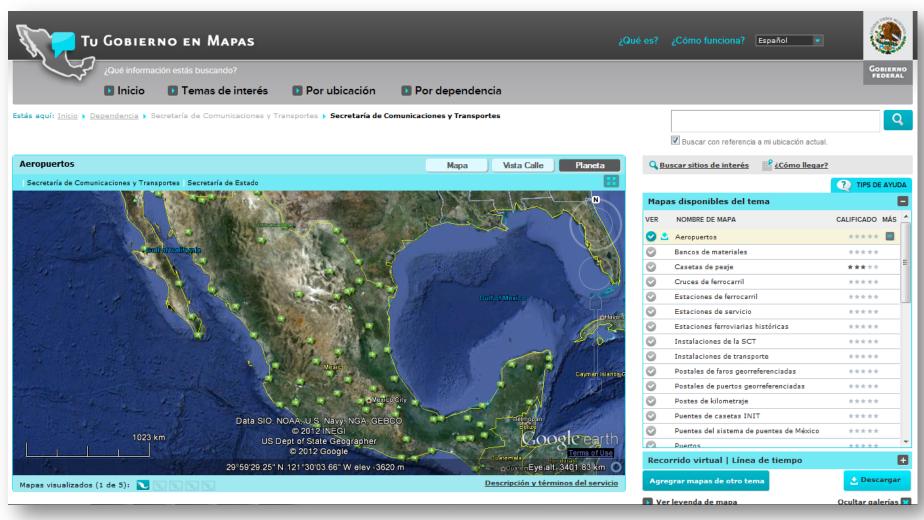

- 200,000 daily average searches
- Available on 197 .gob portals
- More than 40 million searches to date

mapas.gob.mx

Mexican Approach to Open Gov

Legal Mandate

• Open Data & Interoperability Decree

Data Relevance

Search as gov-wide function

Data Availability

Collaboration to extend coverage

Data Visualization

Visualization tools (public infrastructure)

Demand Driven

Positive feedback loop

E-Participation

Enabling processes and tools

Lessons learned

- 1. Without a strong legal mandate open data is a flavor of the day fad.
- 2. Mastering search and analysis as government wide functions is critical for better engagement.
- 3. Governments must foster public information infrastructure (i.e. visualization and big data tools).
- 4. Without a positive G-C-G positive feedback loop no value will be created.

Gracias!
