An urgent call... to develop innovations that address the spread of the Zika virus and other vector-borne diseases

Attention designers, engineers, clinicians and all innovators! We need your knowledge and expertise for a 48-hour hack-a-thon to create new product concepts, design novel personal protective equipment and develop new methods for local vector control that will help bend the curve of the Zika epidemic and similar outbreaks.

> Apply today! bit.ly/ZikaHack DEADLINE: March 23, 2016

The Zika Innovation Hack-a-thon is made possible by the generous support of:
